Professor J. W. Keuffel
Physics Department
University of Utah
Salt Lake City, Utah

Dear Professor Keuffel:

Though your results are as exciting as any in living memory, you must realize what a can of worms you have opened for the theorist. We are offering you the first worm for comment. Perhaps you can kill it before we send it in?

Good Fishing,

Shelly

S. L. Glashow

Art Callan

C. G. Callan Jr.

p.s. U for Utah, of course, but by rights its yours to name.

SLG:Mc

Note added by JWK: The "worm" referred to was a way-out suggestion for massive stable cosmic-ray primaries. We killed it: such particles would give too low a burst production by ~ factor 10^5 !
